1959

PERGAMON PRESS LONDON • NEW YORK • PARIS • LOS ANGELES

CONTENTS

Nos. 1–3

K. J. Murata, C. V. Dutra, M. Teixeira da Costa and J. J. R. Branco: Composition of monazites from pegmatites in Eastern Minas Gerais, Brazil 1

W. S. Broecker and A. Walton: Geochemistry of C^{14} in the freshwater systems 15

D. Greenhalgh and P. M. Jeffery: A contribution to the pre-Cambrian chronology of Australia 39

N. Sen, S. R. Nockolds and R. Allen: Trace elements in minerals from rocks of the S. Californian Batholith 58

J. V. Jizba: Frequency distribution of elements in rocks 79

D. Carroll and H. C. Starkey: Leaching of clay minerals in a limestone environment 83

G. L. Bate, J. R. Huizenga and H. A. Potratz: Thorium in stone meteorites by neutron activation analysis 88

H. H. le Riche: The distribution of certain trace elements in the lower lias of southern England 101

J. F. G. Wilkinson: The geochemistry of a differentiated teschenite sill near Gunnedale, New South Wales 123

J. D. Burton, F. Culkin and J. P. Riley: The abundances of gallium and germanium in terrestrial materials 151

R. E. Belin: Radon in the N. Zealand geothermal regions 182

Geochemical Note:

A. E. Ringwood: Constitution of the mantle—a revision 193

Letters to the Editors:

H. C. Urey: A typical parent meteorite body—a reply to Dr. J. F. Lovering 195

J. F. Lovering: A typical parent meteorite body—reply to Professor Urey 196

R. O. Scott and D. J. Swaine: Further comments on the vanadium–calcium line coincidence at 3185 Å 196

Obituary: F. A. Paneth, 1887–1958. By K. C. Dunham 197

Book Review:

"Fundamentals of the Energetic Analysis of Geochemical Processes" by V. I. Lebedev (Reviewed by D. J. Milton) 198

Meeting Announcements 199

Errata 200

66-47253

QE351
G425
v.16-18

W. U. Ault and J. L. Kulp: Isotopic geochemistry of sulphur . . 201

E. C. Vogel: Uber den Isotopengehalt des Kahlenstoffs in Süsswasser-Kalkablagenungen 236

E. L. Snyder: Distribution of certain elements in the duluth complex . 243

P. G. Jeffrey: The geochemistry of tungsten, with special reference to the rocks of the Uganda Protectorate 278

R. G. Coleman: New occurrences of ferroselite ($FeSe_2$) 296

Letters to the Editors:

P. Signer and A. O. Nier: An upper limit for radiogenic A^{38} in potassium minerals 302

D. M. Shaw: Further comments on the vanadium–calcium coincidence at 3185° Å, a reply to R. O. Scott and D. J. Swaine . . . 303

GEOCHIMICA ET COSMOCHIMICA ACTA

EXECUTIVE EDITORS

PROF. C. W. CORRENS *Sedimentpetrographisches Institut der Universität, Lotzestr.* 13, *Göttingen, Germany*
PROF. E. INGERSON *Department of Geology, University of Texas, Austin* 12, *Texas, U.S.A.*
PROF. L. R. WAGER, F.R.S. *Department of Geology and Mineralogy, The University Museum, Oxford, England*

EDITORS

PROF. L. H. AHRENS *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa*
DR. S. R. NOCKOLDS *Department of Mineralogy and Petrology, The University, Cambridge, England*
PROF. H. C. UREY, For. Mem. R. S. *University of California, La Jolla, California, U.S.A.*
DR. JOHN VERHOOGEN *Department of Geology, University of California, Berkeley, California, U.S.A.*
PROF. A. P. VINOGRADOV *Vernadsky Institute, Moscow, U.S.S.R.*
PROF. W. A. WAHL, *Observatoriegaten 8, Helsingfors, Finland*

INFORMATION FOR CONTRIBUTORS

I. GENERAL

1. Papers on geochemistry should be submitted to the appropriate Executive Editor. Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as letters to the editors. Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal appears as independent and complete numbers, which are combined into volumes of about 300 pages.

2. Only papers which have not been previously published can be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta.*

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French or German.

2. The script should be typed (not a carbon copy). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be redrawn should include all relevant details. Half-tone illustrations should be restricted to the minimum necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet. Any lettering on diagrams—other than Greek letters, symbols, etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS, L. H. (1952) The use of ionization potentials—I. Ionic radii of the elements. *Geochim. et Cosmochim. Acta* **2**, 155–169.

and should include the full title of the article, standard abbreviated title of the journal, year, volume number and inclusive page numbers.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

7. Indices of refraction should be denoted by the symbols α, β, γ, ω, ε, n and vibration directions by X, Y, Z, O and E
